

The Barefoot Eco Hotel is located in one of the very few exclusive and most preserved areas left in the Maldives. The beauty and richness of the underwater world are quite unique in today's Maldives and let you journey back in time. Our PADI and SSI diving center instructors and guides will take you to places no other divers go, where fish, turtles and mantas are sighted for probably the first time in their life. The water is azure blue, warm and the variety of dive spots is stunning. A distinctive section dedicated to our diving center is available clicking on <http://www.thebarefoot.com/portfolio-normal-layout/diving-center>. The new interactive map shows the innumerable dive sites with description and high quality videos.

The Barefoot Restaurant takes pride in sourcing the best ingredients available, seafood arrives fresh and is served to the guests full of flavor. One Italian Chef specialized in Mediterranean dishes continuously wow the guests with creative and unique combinations, textures and flavors in order to provide a memorable experience, full of heart and soul! In order to be an Eco Hotel the Barefoot limits its impact on the environment. We are growing our own farm-to-table fruits and vegetables. This way we can significantly reduce our carbon footprint in consequence of importing goods. Homemade fruit jam is also served fresh daily. Private and romantic dinners, seafood menus can be reserved.

The panoramic "Juice Bar" next to the main restaurant is an ideal gathering place to sip soft drinks, fresh juices and mocktails. A floating bar located not far from the hotel lagoon is offering alcoholic drinks. It is the best place to enjoy the sunset or stargaze after dinner. Complimentary transportation from 18:00 hours.

The Barefoot Eco Hotel follows the principles of eco-sustainability and conservation of the environment as well as the involvement of the local community within its activities:

- we use sustainably grown wood coming from responsibly managed forests
- we use solar photovoltaic panels to generate electricity, limiting the use of diesel generators (very common in the Maldives and highly harmful for the environment)
- we use energy-efficient lighting in order to reduce the electricity consumption
- air condition serves as a water heater using the heat exchanger inside
- we are able to bottle our own drinking water in re-usable glass bottles, drastically reducing our plastic waste.

Our commitment: direct economic involvement of the community; dissemination of knowledge on the environment and culture of Maldives; all goods available on the island are purchased on site; development of specific environmental education programs for the local school; the marine biologists organize clean up days to protect the reef and raise awareness in our guests. All the staff at The Barefoot Eco Hotel works every day to improve the environmental and social situation of the island and there are projects that are still under development.

ACCOMMODATION

Total of 52 rooms: 40 high standard and fully furnished rooms, in two-story blocks of 4 rooms each: 20 Beach Front (50 sqm) on the ground floor with direct access to the white sandy beach, 20 Ocean View (50 sqm) upper floor with a spectacular sea view.
